## **Beijing Medical Insurance Affairs Management Center | Printronix Line Printer Helps out Beijing Medical Insurance Center**

### **Profile**

Beijing Medical Insurance Affairs Management Center is the primary medical insurance institution in Beijing with 24 branches under its control. It is responsible for developing the budget as well as managing and paying medical and birth insurance premiums according to related national and municipal policies. The company also constructs accounting methods for medical and birth insurance premiums for designated medical institutions, and administers final review of mutual medical aid and work-related injury insurance premiums. Following the overall plan of bureau-wide information system construction, Beijing Medical Insurance Affairs Management Center also helps departments concerned with construction, operation, management and maintenance of medical insurance information system while providing statistics and analysis of medical insurance premium payment.

### **Situation**

Beijing Medical Insurance Affairs Management Center needed to print a large number of multi-part statements and invoices on a monthly basis. Unfortunately, the unstable dot matrix printers the company used were slow, the pins broke, and it had frequent 'hot standby' incidents and would lose data. This resulted in frequent repair, and an overall feeling of wasted man-power and money.

### **Results**

Beijing Medical Insurance Affairs Management Center replaced all of its printers with Printronix line printers. The new printers print up to 600-lines per minute, eliminating the problems of broken pins and paper jams. IT personnel were thrilled with the new printers' long and stable operation, high quality of printing and good after-sales service. The superior technical advantages of Printronix printers decreased the companies printing costs, while the innovative design of the color band greatly reduced cost per page and increased efficiency. Currently, all 24 branches of the Beijing Medical Insurance Management Center have replaced dot matrix printers with Printronix line printers.

### **Reaction**

"We were extremely frustrated with the failures of our previous printing devices. Our decision to replace the printer with those from Printronix provides us with printers that are quick and stable with few failures and considerate after-sales service. We are very satisfied."
